

SERIES CONTROLLER USER MANUAL

Part Numbers:

70-LEDMIR6-2430, 70-LEDMIR6-3036, 70-LEDMIR6-4432, 70-LEDMIR10-2432

I. Description of the display & keys

II. Functions & key operations

- Turning on/off Display and Backlight** - Press and hold key ⑥ to turn on the screen and the backlighting of the keypad; the system will show the current temperature & time after 5 seconds. Press key ⑥ shortly to turn on or turn off the LED light on the mirror. The light icon will display on the screen. Press the key ⑥ for 3 seconds to turn off the display & backlight.
- Setting Time** - Press key ⑤ for roughly 3 seconds until the hour number blinks. Press key ① or ② to adjust the hour number when the number is blinking. Then press the key ⑤ to adjust the minute number. Press the key ⑤ to adjust the month or date. The system will accept the new settings when the numbers stop blinking. (Time setting only can be adjusted when the Bluetooth function is shut off)
- Connecting to Bluetooth** - Press key ④ to turn on the Bluetooth music play function. The upper left of the screen will show the progress bar and will then display a blinking "1-bt", the Bluetooth function is now in the search state. Open the Bluetooth function of your phone and connect with the device name of "CA3015". "1-bt" will stop blinking when the phone connects with the system successfully. Connecting to Bluetooth gives you the ability to play music through the mirror speakers. Press the key ① to choose the previous song or ② to select another song. Press key ③ to adjust the volume, pressing key ① to decrease the volume and key ② to increase the volume when the volume icon is blinking.

1. Do not place the mirror close to magnetic or electric fields. Avoid placing near direct sunlight or heating appliances.
2. Since mobile Wi-Fi and Bluetooth are using the same channel, the signal and data may interfere with each other when used simultaneously. This may cause slower download speeds. Listening to the music online with slower download speed may cause intermittent music playback issues.
3. Due to different Bluetooth module manufacturers, some mobile phones may have playback or lost connection issues.
4. The Bluetooth speaker has a range of 10 meters without any barriers such as walls or other electrical appliances.
5. The Bluetooth signal must be manually reconnected if it becomes disconnected.
6. There are slight sounds when the Bluetooth signal is connected. This is normal.
